

RESEARCH:

Thrust areas of Research

- Oral Precancer and Cancer
- Saliva as a diagnostic tool
- Forensic Odontology

Total Projects completed: 16 (2015-2018)

Ongoing Research Projects:

1. Immunohistochemical Evaluation of Ghrelin in Odontogenesis and Odontogenic Tumors- **Dr. Sneha A Ajari**
2. Assessment of the effect of curcumin on arecoline induced human buccal mucosal fibroblasts A Cell Culture study – **Dr. Ritiha C Uppin**
3. Effect of Arecoline and Transforming Growth Factor-B on Myofibroblast transdifferentiation by assessment of mitochondrial bioenergetics: A cell culture study- **Dr. Karishma M Desai**
